

A QUICK AND EASY ON-BOARDING PROCESS – TREATMENT COST CONTAINMENT

A PriceMDs Nurse will assist in each step of the process:

PriceMDs provides a 90-day refill of specialty medication by sourcing from Europe and shipping directly to the patient's home address.

1

Program Overview

A PriceMDs registered nurse will reach out to an eligible member by phone and/or email to explain how this program works for them.

2

Nurse Navigator

A PriceMDs Nurse is assigned to member for the duration of their case. They will secure a HIPAA release and conduct an initial review of the member's file.

3

Real ID OR Passport

A photocopy of a Real ID or current or expired passport book or card is required for importation of medication. No travel required!

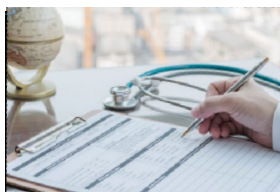

4

Telehealth Call

A U.S. Licensed physician will consult and review member case and duplicate the current script in order to source it from a lower cost international provider.

5

Rx Script & Sourcing

Rx meds are sourced from authorized and certified pharmaceutical suppliers internationally in compliance with FDA, USDA and CPB.

6

Meds are Shipped

All meds (*cold chain included*) are shipped via best-in-class courier meeting all importation protocols. Transit times take an average of 2-4 days to deliver to member.

7

Member receives Meds

The medication shipment is delivered to member's final location. Any temperature sensitive meds (cold chain) include temperature sensors or data loggers to ensure quality.

8

Member Follow Up

Once delivery of meds occurs their designated, personal Nurse Navigator (RN) contacts the member to confirm delivery and to answer any questions.
