

## Ready to treat your **adult acne**?

If you struggle with adult acne, Teladoc Dermatology can help. Our board-certified dermatologists are available by app or web and will respond to visit requests within two business days.

Simply upload three photos of the affected area and you'll receive a diagnosis and treatment in days, not weeks. In addition to acne, our dermatologists treat skin infections, moles, rosacea, psoriasis, and more. Here are some tips for getting your acne under control:

## Watch what you eat.

Research suggests hormones in dairy products and foods with a high glycemic index may increase acne breakouts.

## Put stress in check.

Anxiety and stressful situations can trigger the hormone cortisol, which can make skin oilier.

## Skip the teenage acne treatments.

As our skin ages, we have to treat it with milder products.
